

NEW Product Release

ANYWHERE. ANYTIME.

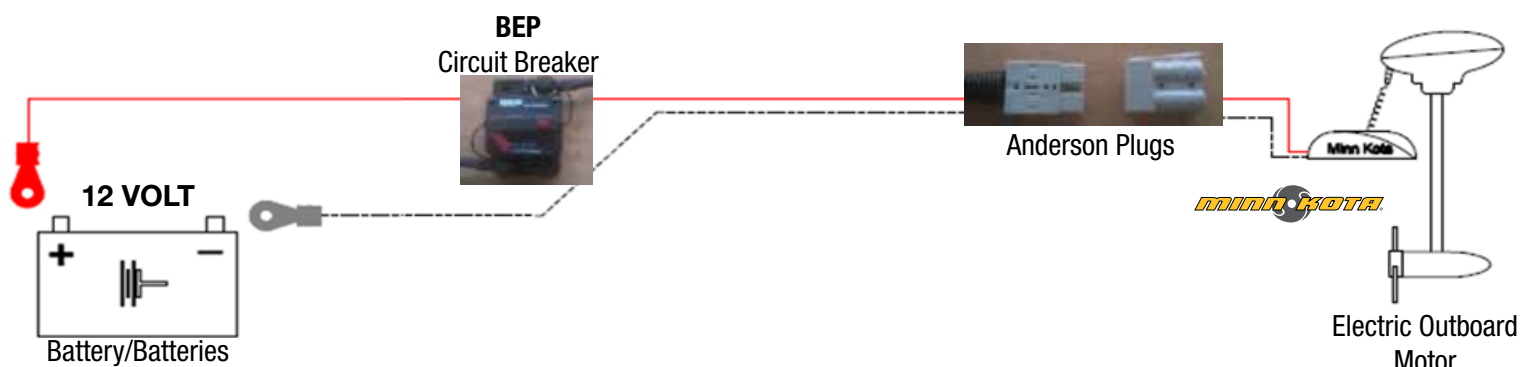

3 & 6 METRE WIRING LOOMS t/s ELECTRIC MOTORS

Introducing easy to install wiring looms complete with plugs and terminal ends for Minn Kota® and other brands of electric outboard motors.

Available in popular three and six metre lengths ready for installation these looms are manufactured using quality materials and fittings. Each cable features 10mm marine grade tinned copper wire, quality 50 amp BEP resettable circuit breaker, Anderson plug kit and fixed terminals.

For safety, protection, ease of installation and neatness each loom is supplied encased in black flame retardant corrugated conduit.

For the installation of 24 volt motors the purchase of one 113676 300mm flexible terminal link is required, allowing the connection from one batteries positive to the others negative. Full instructions with simple to follow pictures is included for easy installation.
